

PRODUCT FAMILY DATASHEET

Jewelry Chains

Diamond-set Cuban link chain produced to order in 925 sterling silver and 9K, 10K, 14K or 18K gold, in the buyer's own width and finish.

What This Family Is For

Chain is the product where a workshop's link work is visible from across a room, and it is also the product most often sold from a fixed catalogue of three widths. This one is not. Metal, karat, link width, length, stone setting, plating and finish are all specified per order, and the workshop states it customises the manufacturing process itself where a design calls for unique mechanical work.

Products In This Family

Product	Group	Summary
Gold And Natural Diamond Cuban Link Chain	Chains And Link Jewellery	Diamond-set Cuban link chains produced in 925 sterling silver and 9K, 10K, 14K or 18K gold, in a range of finishes, stone settings and platings to the buyer's brief.

Published Specification

Property	Value
Product type	Diamond-set Cuban link chain
Metals	925 sterling silver, 9K, 10K, 14K, 18K gold
Finishes	To order
Stone setting	To order
Plating	To order
Link width	To order

Stones	Natural diamonds; grade to order
Price	Quoted per enquiry; the source publishes no price

Figures are reproduced from the manufacturer's published specification and may be revised. Rows reading 'not published' are figures the source specification does not publish; they are confirmed in writing rather than estimated. Confirm the current revision with your quotation.

Why Buyers Choose This Range

- 925 sterling silver through to 18K gold on the same design
- Finishes, stone settings and platings applied to the customer's specification
- Link width gauged at intervals along the whole length
- Bracelet and chain sets tooled together so the links actually match
- Diamond, moissanite or cubic zirconia to suit the price point

Problems It Solves

- Link width that drifts along the length of a chain
- Stone density that thins out toward the clasp end
- Plated silver sold as solid gold
- Chains that roll instead of lying flat
- Suppliers who only offer their own fixed catalogue of widths

Who It Is For

- Streetwear and statement jewellery brands
- Wholesalers carrying chain by width and karat
- Online sellers running a made-to-order model
- Designers who need link work rather than castings

Application Scenarios

- A chain programme in three widths across silver and gold tiers
- A private label run with a specified plating and finish
- A matched chain and bracelet set for a streetwear brand
- A heavy chain rated to carry a solid pave pendant

Materials

- 925 sterling silver
- 9K / 10K / 14K / 18K gold
- Natural diamonds

Manufacturing Process

1. Link tooling
2. Casting or fabrication
3. Link assembly
4. Stone setting
5. Plating and finishing
6. Clasp fitting

Customisation Options

- Any width, length and link profile
- 925 silver through to 18K gold
- Diamond, moissanite or cubic zirconia settings
- Rhodium, gold or rose gold plating and a choice of finishes

Certification Standards

Production follows GIA certificate available on certified stones, Type A jade certification available, Nickel-safe alloys. Certificates are sent per product on request.

Questions Buyers Ask

What is the minimum order on chain?

The source publishes no minimum order quantity. Send width, length, karat and quantity and it is quoted against that.

Can you do 925 silver with gold plating?

Yes. The source lists 925 sterling silver among its metals and states that platings and finishes are applied to the customer's requirements.

Diamond or simulant?

Both are quoted. Diamond-set is the published listing; moissanite and cubic zirconia are alternatives where the price point needs them.

Can the chain and bracelet be made to match?

Only if they are ordered together, so the link tooling and stone density are the same run. Ordered separately they will differ.
