How To Read This Catalogue

Item is the production code. Quote it in any enquiry and we can pull the exact specification.

Height is the finished height from the base of the pot to the top of the canopy.

Leaves is the production leaf count, held as the standard across repeat orders.

PCS/40HQ is the number of pieces that fit in a 40 foot high cube container. Compare this figure, not the carton size, when you are comparing freight cost per tree.

TBC means we have not verified that figure yet. Ask and we will confirm it against the production specification before you order.
