

# Chamber Room Planning Checklist

Complete before the model is confirmed, not after the deposit is paid

A chamber that will not fit through the door is a write-off, not a delay. Take a tape measure and fill this in, then send it over WhatsApp - the factory will confirm the model or propose an alternative.

## If the route does not work

Two options. Soft-shell chambers arrive folded and pass anywhere a person can walk. The OHD15 is built from CNC-machined aluminium sections and assembled in the room, which is the standard answer where a rigid chamber

cannot be carried in whole.

This document describes equipment. It is not medical advice. How a hyperbaric chamber may be used, and by whom, is set by the regulations of the country it is installed in, and meeting them is the buyer's responsibility. No product certification is claimed; values the factory does not publish are marked TBC.
