

GARDEN WATERING PRODUCTS

Mechanical Water Timers Specification Sheet

A mechanical timer is the cheapest way to stop a customer flooding their lawn. No battery, no app, no programming. You turn the dial to the number of minutes you want and it shuts the water off by itself. It is a reliable impulse purchase next to the sprinklers, and it is the product that makes an unattended sprinkler safe to sell.

Why This Family Is Built This Way

- Mechanical two hour movement with no battery to fail or replace
- Three way version splits one tap between two lines and the timer
- Soft coated dial versions for the higher price point
- Double blister packing with 24 pieces per carton

Problems It Solves

- Customers who leave a sprinkler running and are then afraid to use it again
- Battery powered timers that fail outdoors and get returned
- Sprinkler sales that stall because there is no simple shut off next to them
- Households that want to water two zones from one outdoor tap

The 3 Models

Model	Description	Packing	Pcs/Ctn	Carton Size cm	CBM	N.W. kg	G.W. kg
YM202	2-Hour Water Timer	Double blister	24	65 x 30 x 24	0.047	4.8	5.7
YM202E	Soft Coated 2-Hour Water Timer	Double blister	24	65 x 30 x 24	0.047	5	5.9
YM203e	Soft Coated 2-Hour Three Way Water Timer	Double blister	24	65 x 30 x 24	0.041	4.3	5.3

Questions Buyers Ask

Do these timers need a battery?

No. They are mechanical. You turn the dial to the running time you want and the movement closes the valve when it reaches zero.

How long do they run for?

Up to two hours. That is the full range of the dial on all three models in this family.

What does the three way timer do?

It combines a two way tap split with the timer body, so one outdoor tap can feed a timed sprinkler line and a second untimed outlet at the same time.

How are the timers packed?

In a double blister, 24 pieces per carton, in a 65 x 30 x 24 cm carton at 0.041 to 0.047 CBM depending on the model.

Will the timer fit our taps?

The timers are built for standard domestic outdoor tap threads and pair with the tap adaptors in our hose fitting family. Send a photo of the tap you are designing around and we will confirm before you order.
